

T5DataCenters™
Top Tier. Bottom Line.

T5@Colorado

Now Leasing

T5@Colorado is a pre-planned, pad-ready 64 acre data center campus with all infrastructure plans, entitlements, zoning and economic incentives in place to facilitate the construction of your optimal single or multi-tenant enterprise data center design with the lowest lead time and project costs.

- + Highly resilient and robust data center specific infrastructure with ultimate design flexibility
- + Dual, independent substations serving the campus with on-site expansion to 100MW
- + Up to 14 telecom providers with dual independent routing and low latency national connectivity
- + Proven enterprise location with low risk of natural and man-made business interruption
