BRING YOUR VISION.

WE'LL TAKE CARE OF THE REST.

T5 is your full lifecycle data center partner.

We provide customized build-to-suit, wholesale turnkey or powered shell data centers, critical facility construction, and ongoing facility management and operations services.

Your data needs will continue to grow. T5 will help you scale up—and stay Forever On.

DIRECT SOLAR OFFSETS

Utilize excess rooftop, parking deck, or adjacent land sites to offset your data center power consumption with 100% renewable solar solutions.

ZERO WATER LOSS

WUE = 0 is attainable with T5's Zero Water Loss cooling solutions.

THE RIGHT MIX: OPTIMIZE YOUR POWER STRATEGY

Create the optimal mix of Renewable Energy Certificates (RECs) and Power Purchase Agreements (PPAs) to align your data center needs with your overall corporate sustainability initiatives.

REDUCED VOC CONTENT

With our material design, VOC content in your data center drops measurably.

WORKPLACE WELLNESS PROGRAM

Utilize a facility that maintains 100% uptime while it simultaneously enhances the health and wellbeing of the individuals that work there.

REDUCE AND OFFSET TO LOWER YOUR UTILITY PUE

With rooftop or other small-scale solar installations, reduce your dependence on utility power and offset non-critical loads.

24/7 CARBON TRACKING & REPORTING

Real-time, efficient, and transparent digital carbon tracking and reporting, enabling our customers to optimize their energy consumption and further their environmental sustainability goals.
