

FOR IMMEDIATE RELEASE

T5 Data Centers Appoints David Mettler as New EVP of Sales and Marketing

ATLANTA, Ga. - January 22, 2023 - [T5 Data Centers \(T5\)](#), the telecommunications industry's only full lifecycle data center partner, announced the appointment of David Mettler as its new Executive Vice President of Sales and Marketing. Mettler will oversee all marketing and sales operations and play a key role in driving the company's growth strategy.

"David is a proven leader with over 20 years of experience driving company growth and sales strategies for leading digital infrastructure brands," said T5 Data Centers Chief Operating Officer, Tom Mertz. "His expertise in overall strategy, sales development and enablement will be invaluable as we expand our market footprint and execute on T5's vision of delivering large campus capacity to targeted end users. Additionally, his experience in data center services will help us continue to drive customer growth in our facility management and construction services lines of business."

Mettler entered the telecommunications industry as a data networking engineer and later moved into sales before transitioning into data centers selling managed services and colocation solutions. Mettler previously worked as a data center development consultant for the Rockefeller Group, Chief Revenue Officer at CPG, Vice President of Sales of Iron Mountain, VP of Sales, and Head of Sales in EMEA for SAVVIS based out of London.

"David has extensive experience leading data center sales for over two decades, competing for the most desirable customers in the market," commented Pete Marin, President and CEO of T5 Data Centers. "He is the right person to catapult T5 into long-term success and execute our forward vision. He has a proven track record of overperforming on sales goals, acquiring new customers and adapting to clients' needs. We are thrilled to have him on board."

"I am excited to join T5 and lead their world-class marketing and sales organization," said Mettler. "The T5 brand is well recognized in the data center industry for high quality asset development and service delivery. I look forward to working closely with the leadership team as we help our customers meet their capacity sourcing and data center operations needs. Our

ability to engage customers in meaningful ways and deliver to their requirements will drive accelerated growth across all markets."

Mettler holds a B.S. in Systems Engineering from the University of Virginia. He resides in Rowayton, Connecticut, with his wife, Betsy and children. In his personal time, he is active in the community, his church, and playing tennis, as well as cruising the waters along his coastal town with Betsy and their two daughters, both skilled sailors.
